

My comments on this Do-Not-Call registry is this: I have signed up with this program in late June of 2003. Since then, right after i have registered my home phone, i have gotten numerous calls from "out of area", and other telemarketers. If this program is to block telemarketers and other unwanted calls, then why are we receiving more than we have before I registered our number?

If you have the answer, please reply.

Or if you don't, please delete the following three (3) numbers from the program, anyway you can.

1. (847) 299-0483
2. (847) 644-1077
3. (847) 420-1496

Thank you!
